fraancofraiese@gmail.com

I'm a FullStack Developer and I have more than 1 year of experience performing as web application developer.

I managed to deepen my knowledge in **JavaScript**, **TypeScript**, **Node**, **React** y **Redux**. I worked Node as much with **Nest** as **Express**.

About databases, I have more experience with **PostgreSQL**, but I also worked with **MongoDB** and **MySQL**.

I stand out in endpoints planning and information flow management in order to optimize the application as most as possible.

I'm looking for opportunities that represent new challenges and allow me to continue growing as professional.

Experience

Freelance - Back-end Developer | February 23 - Present

Part-time job as Back-end where I did:

- Endpoints optimization and management, aiming to reduce response time and fixing malfunctions.
- Integral development of new functions using the current structure to add them to the production code.
- Microservices development for a new platform.

Technological stack: TypeScript, Node, Nest, MySQL, MongoDB, Prisma, AWS.

UTN Buenos Aires - Full-Stack Developer | November 22 - March 23

I worked in the development of a real estate web where I mainly was responsible of:

- Developing a CMS with an intern authentication system and one external connected to client's intranet.
- Creating a dynamic system of roles and permissions that allow the administrators to manage the actions that their users can do in each branch office, enabling different actions in different branch offices.
- Individual uploading of properties through a form, or multiple uploading through external files (.csv, .xls, etc.).
- Integration of Google Maps API with customized area limitation and predictable autocomplete of selected area.

Technological stack: JavaScript, TypeScript, React, Redux Toolkit, Node, Nest, PostgreSQL, MongoDB, TypeORM.

Projects

Madeira Stats - Front-end Developer | September 22

Team development of a videogame website, where I was in charge of develop:

- An authentication system with fully customizable profile.
- A ranking that classifies users by score and category, allowing filtering and sorting by multiple parameters.

Also, I was responsible of platform's complete design, making a presentation and low and high fidelity mockups using Figma.

Technological stack: JavaScript, TypeScript, React, Redux, Node, Nest, Docker, MongoDB, Sequelize.

SoyHenry, REwork - FullStack Developer | July 22 - August 22

Group final project of the bootcamp where we built a job searching platform, where I did:

- The register and login system for users from database complementing it with Google Auth API.
- Information management system for 2 types of users that enables each one different actions and visuals within the platform.
- Contract system with security validations and payment on the platform, released to the worker upon confirmation of contract completion.

Technological stack: JavaScript, TypeScript, React, Redux Toolkit, Node, Express, PostgreSQL, Sequelize.

Skills

Programming Languages: Advanced: JavaScript | Intermediate: Node, TypeScript

Frameworks: Advanced: React, Redux | Intermediate: Express, Nest | Basico: Vue

Databases: Intermediate: MongoDB, PostgreSQL, MySQL

Toolkit: Git (BitBucket, GitLab, GitHub), Jira, Trello, Miro

Agile methodologies: Scrum, Kanban

Languages: Spanish (Native), English (Intermediate B2)

Education

SoyHenry - FullStack Developer Bootcamp - April to August 2022

UTNMdP - Programming Technician - March to September 2021
